

Gestisoft

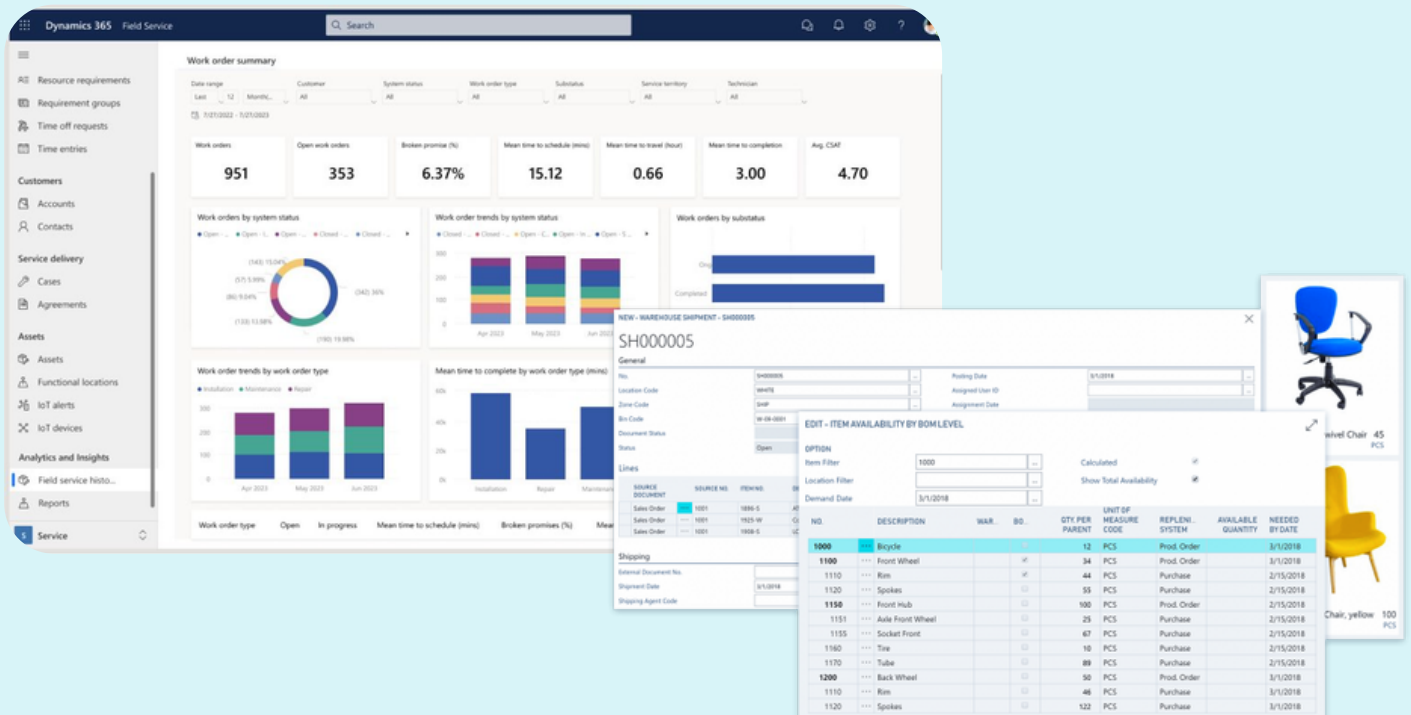

**Production made
simple with
Business Central**

Manufacture

Our ERP solution optimizes every step of your production, significantly improving efficiency and collaboration within your company.

Benefit from integrated financial management and perfect synchronization with Microsoft Office to facilitate the daily monitoring of your operations.

From warehousing to shipping, Business Central simplifies planning and puts you in complete control, improving your business's responsiveness and productivity.

Main features

Complete supply chain management: Accurately track your inventory and material requirements planning (MRP).

Integration with Office: Improve communication and collaboration through seamless integration with Microsoft Office.

Process specialization: Specialized tools for ETO, ATO, MTO, allowing optimal project management.

All-in-one financial management: Eliminate the need for other software with an integrated financial solution.

Solutions Partner

Integrations & Customizations

Take advantage of an ERP that stands out for its ability to integrate extensions from AppSource, allowing you to further customize your system according to your specific needs.

Plus, with Dynamics 365 Copilot integration, benefit from advanced AI assistance to optimize your operations and decision-making.

This combination ensures continuous adaptation to the evolution of your industry while maintaining a familiar and intuitive interface.

Gestisoft

We are experts in ERP solutions for the manufacturing sector, offering total visibility over your production chain, from parts ordering to machine management.

Our solution covers all your needs, from engineering to order (ETO), assembly to order (ATO), to manufacturing to order (MTO).
